

## Superlift Quick Reference

### 2008 Ford Super Duty 4WD with lift via rear blocks (except dually).

Insert into Catalog #115.

The 2008 Super Duty comes from the factory with has several different rear block and U-bolt configurations:

- **Short block Only** - Truck has a 1.91" tall factory block and no Top-Mounted Overload (TMO) springs. This is by far the most common; this configuration is listed in our catalog charts, and included in our Master Pack.

If your truck is equipped differently, and you are ordering the lift system in component form, order the appropriate block kit. If lift system is being ordered in Master Pack (K-number) form, order the appropriate U-bolt kit.

- **Short block and Top-Mounted Overload (TMO) springs.**
- **Tall block** - Truck has 3.71" tall factory block. Generally found on F-350.
- **Tall block and Top-Mounted Overload (TMO) springs.**

| Lift Front / Rear       | Product    | Short Block Only | Short Block & TMO | Tall Block | Tall Block & TMO |
