### Part Numbers:

- #20510.... Crew Cab Short Bed / Standard Series
- #20515.... Crew Cab Short Bed / Select Series
- #20520.... Long Bed, All Cabs / Standard Series
- #20525.... Long Bed, All Cabs / Select Series

### Application:

2008 Ford F-250 / 350 Super Duty 4WD

### Standard and Select Series Available:

Torque Max™ bars are offered in two versions. Standard Series bars feature one main-beam tube than spans from the rear axle-to-frame. Our Torque Max™ Select bars incorporate an additional tubular brace on the main beam plus a "3-D" brushed stainless steel Superlift "flaming" logo insert. The Select Series bars are recommended for use with 37" or taller tires, or for any truck that's spunky. Both bar versions feature the critically important swivel-ends.

### Is it in current Superlift Catalog (#115)?

YES

### Why Torque-Max?

Effective wrap-up control starts with proper geometry. Leaf springs become longer as they compress so in order to prevent suspension bind the traction bars' arc of travel must be in-sync with the rear springs' movement. Each set of Torque Max™ bars is the correct length for your particular vehicle to ensure proper function and the best possible ride quality. Our designers added another new "twist" to the Torque Max™ design. Any time the springs are not being evenly compressed, such as when you are turning or driving off-road, a twisting force is transmitted through the traction bars to their frame anchor point. The unique Torque Max™ swivel-ends prevent these destructive torsional loads from stressing the truck's frame. Additionally, this design results in much better handling and ride quality, plus it provides noise-free operation.
