

New Dual Steering Stabilizers for 2008 - 09 Dodge 2500-3500 HD

Built on or after 3-1-08

Part Numbers:

#92709.....2008 and newer HDs built on or after 3/1/08 (silver zinc cylinders)

#92708.....2008 and newer HDs built on or after 3/1/08 (white Superide cylinders)

Why the New Design?

Superlift's new dual steering stabilizer kit is required for 2008 and newer Dodge 2500 / 3500 HD 4WDs manufactured on or after 3-1-08. Starting in March 2008, the Dodge HD steering linkage design changed from an "inverted Y" style (the tie rod connects to the drag link) to a "cross car" linkage style (a full-length tie rod spans from knuckle-to-knuckle).

This dual kit is offered with the white Superide cylinders (#92708), or with the SS series, zinc plated monotube gas cylinders (#92709).

#92709

Fits 2008 and newer HDs built on or after 3/1/08.

#92708

Fits 2008 and newer HDs built on or after 3/1/08.

#92700

"Flame" style dual kit is offered for 2003-08 models (built before 3/1/08). #92670 contains white Superide cylinders. #92700 with silver zinc SS cylinders is shown.

Dodge Ram 2500 / 3500 4WD (including 1500, 2500, 3500 MEGA CAB) 2008 Built On or After 3-1-08 (with HEMI or 6.7L CUMMINS)
