

Affected Vehicles:

- **Jeep Wrangler (JK) 2WD and 4WD** - All equipped with Electronic Stability Program (ESP).
- **General Motors** - All 2007 and newer General Motors light trucks and SUVs equipped with Stabilitrac, GM's version of an Electronic Stability Program (ESP). Subject: For the various ESP and Stabilitrac sensors to function properly, it is crucial that steering alignment, including steering wheel "center" is precisely correct. An "all wheel" laser alignment is recommended.
